## WORK EXPERIENCE

### Freelance Full Stack Web Developer : *FULL-STACK DEVELOPER*

JAN 2024 - FEB 2024

- Enhanced customer engagement capabilities by improved search engine visibility, getting SEO score of 83/100 also score of 93/100 in BEST PRACTICES.
- Utilized the industry's leading hosting service, surpassing client expectations by offering a solution that is 50% more cost-effective than anticipated.

## TECHNICAL SKILLS

**Expertise and Area of Interests:**

Blockchain development, Full-stack development

**Programming Languages and Frameworks:**

TypeScript, Solidity, Nextjs, Nodejs

## PROJECTS

### RAFFLE

Hardhat, Chainlink, Ethereum, Next.js, Tailwind CSS, IPFS, web3uikit, Moralis

- The project centered around a raffle system where participants could join with a designated entrance fee. This fee would then be allocated to the smart contract, and from all the participants, one winner would be randomly chosen to receive the total value held by the smart contract.
- Tested the project thoroughly by unit and staging testing, implemented all aspects to test the smart contract

### Medium

React, Hono(backend), Typescript, Prisma(ORM), Vercel, Tailwind CSS

- Developed a Medium-style blogging app with a serverless backend, robust validation, efficient ORM, secure authentication, and deployment on Vercel and Netlify.
- Implemented seamless data management and optimized performance. Ensured a responsive and user-friendly interface.

### Paypal Wallet

React, Javascript, mongodb, Tailwind CSS

- The PayPal project focused on developing a web2-based digital wallet system. Implemented features included secure authentication through Jsonwebtoken, robust data validation with Zod.
- This project significantly enhanced my skills in backend development, frontend design, and security implementation, crucial for building reliable fintech solutions.

## ACHIEVEMENTS

**Badges got in [LeetCode](#) :** 50 Days Badge 2022, May Badge, Apr Badge, Mar Badges, as well as completed 200+ problems.
